

# Civil Engineering 2000

## Index

**IMPORTANT NOTE to readers:** Editions 3 and 4 (March and April) were combined during 2000 and therefore all references to Magazine number 4 are for the MAY 2000 edition (although the table of contents of that edition refers to it as number 5). References to edition 5 are for the June edition.

| TITLE  | Magazine No<br>& Page |
|--|-----------------------|
| <b>Around Kwazulu-Natal</b>  |                       |
| Aluminium dome church for Durban   | 7/23                  |
| Fermentation tanks used as structural elements at SAB's Prospecton plant | 7/27                  |
| Innovative tug launch  | 7/25                  |
| <b>Around the Globe</b>  |                       |
| Africa Engineers Forum   | 8/35                  |
| ASCE and US  | 8/35                  |
| Asia's largest architectural complex                                     | 8/15                  |
| Bridging research/industry gap   | 1/23                  |
| Commonwealth Young Professionals Millennium Conference                   | 7/33                  |
| Composites chosen for showcase bridge                                    | 1/23                  |
| Co-operation between South African and Ghanaian civil engineers          | 6/31                  |
| Engineer shares pride of place in cathedral window                       | 9/32                  |
| New opportunities in China for South African construction professionals  | 8/7                   |
| SAACE holds fruitful discussions with World Bank                         | 10/47                 |
| Turbo grinders for world's largest hydropower project                    | 8/15                  |
| Zip to Zim   | 5/33                  |
| <b>Around the Lowveld</b>  |                       |
| Complex nearing completion   | 10/29                 |
| Engineers improvise to restore sewer main over river in Kabokweni        | 10/30                 |
| Focus on the Lowveld   | 10/28                 |
| Making a difference to flood victims                                     | 10/31                 |
| Witbank-Maputo Corridor on track for completion next year                | 10/32                 |
| <b>Around the Western Cape</b>   |                       |
| Civil Engineering status report, March 2000                              | 3/21                  |
| Pro-o-o-o-vince! A top-class facility for a top-class team at Newlands   | 3/18                  |
| <b>Awards</b>  |                       |
| Accolades for Paris Dam  | 9/3                   |
| Awards: And the winners are...!  | 8/35                  |
| Basil Read Award for 1999  | 7/12                  |
| Besoedeling van waterbronne in die Hoëveldrifomgewing                    | 3/27                  |
| Bloem Water: Augmentation of Greater Bloemfontein Water Supply           | 3/25                  |
| Commendation for Hogback Dam   | 10/4                  |
| Geotechnical Awards: Call for nominations                                | 5/23                  |
| Nelson Mandela Drive, Pretoria   | 2/27                  |
| SAICE Student Award: Best National Diploma 1999                          | 9/36                  |
| The Bob Laburn Award, 1999   | 9/29                  |

| TITLE  | Magazine No<br>& Page |
|--|-----------------------|
| The most outstanding civil engineering achievements in 1999                          | 9/9                   |
| Transnet Award 1999  | 1/25                  |
| Upgrading of road between Gordon's Bay and Rooi Els                                  | 1/12                  |
| <b>Bookshelf</b>   |                       |
| Bridge foundations   | 1/35                  |
| Heroic endeavour   | 1/35                  |
| New publication on structural concrete masonry                                       | 2/11                  |
| SABS standards for precast concrete  | 1/35                  |
| On datums and map projections  | 1/35                  |
| Construction Law in New Zealand  | 4/32                  |

| <i>Focus on Construction Engineering:</i>  |                       |
| • Lesotho Highlands Water Project: Mohale Tunnel progress update                     | 7/7                   |
| • Mohale tunnel fully lined with precast concrete                                    | 7/8                   |
| • Biggest construction deal yet  | 7/11                  |
| • Building a new South Africa  | 7/11                  |
| • Basil Read Award for 1999  | 7/12                  |
| • Maguga Dam scheduled for completion in 2001  | 7/13                  |
| • Elegant shops rise from the rubble   | 7/15                  |
| • Construction forging ahead on the N3 toll road                                     | 7/17                  |
| • Injaka Dam to supply Bushbuckridge area  | 7/20                  |
| • Reconstructed Injaka Bridge to be completed soon                                   | 7/20                  |
| <i>Focus on Environmental Engineering:</i>   |                       |
| • The failure of bridges during floods: some issues that need to be addressed        | 3/3                   |
| • Preserving South Africa's heritage: archaeological assessment often compulsory     | 3/10                  |
| • Putting down roots   | 3/14                  |
| • Fog collector harvests water in arid areas   | 3/16                  |
| <i>Focus on Geotechnical Engineering:</i>  |                       |
| • The geotechnical industry in South Africa: <i>Quo vadis</i> in the new millennium? | 5/9                   |
| • Young Geotechnical Engineers Conference 2000                                       | 5/11                  |
| • General  | 5/13                  |

| TITLE  | Magazine No<br>& Page |
|--|-----------------------|
| • Diversity is Esor's answer   | 5/14                  |
| • Foundations for a large aluminium smelter complex underlain by deep collapsing residual soils in southern Mozambique | 5/18                  |
| • Geotechnical Awards: Call for nominations  | 5/23                  |
| • Young Engineers Contest  | 5/23                  |
| <br><i>Focus on Harbour Engineering</i>  |                       |
| • New research on old dolosse  | 10/7                  |
| • Simulating oil spills with computer models   | 10/9                  |
| • Optimisation of dredging through understanding the unusual littoral regime at East London                            | 10/11                 |
| • Quay wall extension, Port of Richards Bay  | 10/12                 |
| • Turbidity and shoreline changes caused by dredging at Richards Bay   | 10/14                 |
| • Shoreline protection along the navigational channel in Richards Bay  | 10/16                 |
| • Expansion of the Port of Saldanha investigated   | 10/17                 |
| <br><i>Focus on Information Technology</i>   |                       |
| • Get connected!   | 9/12                  |
| • Information Technology in the steel construction industry  | 9/17                  |
| • Coming to grips with the IT revolution   | 9/21                  |
| <br><i>Focus on Railway and Harbour Engineering</i>  |                       |
| • New high-tech infrastructure measuring car for Spoornet  | 8/17                  |
| • Surveying 3 875 km of railroad track in South Africa   | 8/18                  |
| • Mud-holes: prevention is better than cure  | 8/25                  |
| • New ballastless beam-track system  | 8/28                  |
| • Lennings Rail Services   | 8/29                  |
| • Bayhead Road widening  | 8/31                  |
| • Quay wall extension and terminal development   | 8/31                  |
| • Major rehabilitation work done on the coal line  | 8/32                  |
| • Dolphin construction in the port of Durban   | 8/32                  |
| • Cost-saving technology   | 8/32                  |
| <br><i>Focus on Structural Engineering:</i>  |                       |
| • Joint Structural Division of SAICE   | 2/6                   |
| • New structures testing facility  | 2/6                   |
| • JSD 2000 Committee   | 2/6                   |
| • Trevor Trenley Ward Geach  | 2/7                   |
| • Concrete Code  | 2/7                   |
| • Steel Codes update   | 2/7                   |
| • Carnival City  | 2/8                   |
| • CSSA Inland Branch news  | 2/8                   |
| • New bracing rules for timber structures and roof trusses   | 2/9                   |
| • Is there a demand for more civil engineering graduates in South Africa?  | 2/10                  |
| • UK's Les Clark visits SA   | 2/11                  |
| • Progress in soils technology   | 2/11                  |
| • New publication on structural concrete masonry   | 2/11                  |
| • Another look at low-cost housing   | 2/12                  |
| • Lessons learnt from design of conveyor structures course   | 2/14                  |
| <br><i>Focus on Urban and Rural Engineering</i>  |                       |
| • Getting to know Urban and Rural  | 10/19                 |
| • Rural development: challenges brought along by the demarcation process   | 10/19                 |
| • Rural development: the upgrading of denser settlements   | 10/21                 |
| • City improvement districts   | 10/22                 |
