

sustainable civil engineering beyond 2010

engineering planet future

hosted by the south african institution of civil engineering

csir convention centre pretoria south africa

16-18 March 2010

diarise this date

16-18 MARCH 2010

come blow your vuvuzela at this International Indaba

The challenge to civil engineering and related professions is to explore the concept of SUSTAINABILITY.

This Indaba goes way beyond "greening" and offers lots of interaction, cut-to-the-core debates and activities, towards enlightening and defining sustainability, to make environmental and economic sense.

- Technical innovation
Leadership and decision making
Social issues
Ethical issues

Join 400 innovative decision makers as well as leaders in civil engineering from South Africa, Africa and various other countries.
